

## **TITLE 4 CHAPTER 3**

### **AIR CONDITIONERS**

#### **SECTION:**

#### **4-3-1:Drainage Requirements**

#### **4-3-1:DRAINAGE REQUIREMENTS;**

(A) Drain Into Sewers: Every owner or occupant of any building within the City who maintains an air conditioner or other any other device which is operated by water or permits an accumulation of water must provide a direct connection from such air conditioner or such device to the sanitary sewer in the building or to the storm sewer for the disposal of the excess water.

(B) Drain Upon Alleys or Streets: It shall be unlawful for anyone to discharge or permit water to be discharged in and upon the alleys or streets of the City, other than that which is incident to the natural precipitation drainage from roofs.
